---

*(Monroe's Motivated Sequence → Visualisation)*

III. Visualize Results: Travel with friend benefits both, your friends and yourself.

A. If you travel with your friends, you can form a closer bond and having better experiences.

1. Traveling with someone you know is a very easy way to know your level of friendship. Whether you hardly know someone or think you will be best friends for life, by traveling you will quickly find out a lot about another person through the way they react. Even the boring parts of traveling will reveal a new side to their personality. I personally believe that traveling with your friends is the best way to travel. Whether backpacking round the world for several months, or just taking a weekend trip to a different city.
2. The benefits of traveling with friends are quite obvious. You are guaranteed good company with someone you know you get along well with. If things go wrong, you know someone else will be there with you to help you get through it. Most people come back from traveling much closer to each other than they were before. It is also fun to create special and unique memories with someone close to you. As it is a shame and weird to spend some of the best moments of your life with complete strangers. One of the major benefits is that if you know the person you plan a trip with, you know what to expect from them. You know if they are a morning person or like to sleep late, whether they enjoy sightseeing or relaxing, and what their expectations are for the journey.

B. The problem arises when you are travel with your family.

1. When you go to travel with your family, sometimes you will be disappointed because many activities cannot be done as you planned. You also will have an argument with your siblings for some reasons and you do not feel enjoy for the travel or holiday.
    - a. For example, it happened to myself. I went vacation with my family at Pulau Pangkor. On the island I really hoping for "banana boat" activity. But my mother didn't allow it since it seen an extreme activity for our whole family. After that, our activity will end after 8 o'clock, which it is to early to have a nap. Due of this, the family trip was not fun at all.
-

## Conclusion

### *(Monroe's Motivated Sequence → Action)*

- I. As you can easily see, people now days having a stressful time on theirs daily life. The stressful can lead to depression and according to WHO it happened to over than 264 million people around the world. Due of this, we need to find ways to occur it and the one of the ways is to have a quality holiday with travel with friends. It is more freedom to do any activities and also can create many valuable and exciting memories together.
- II. Find a friend that have a willingness to travel with you, with this you can see which among of your friends got a potential to be a closer friend. Which in travel they acquired to spend their time, money and etc.
- III. Besides, if your friend offered for a vacation, just accept the offer. Imagine that you have an awesome memory like watch the sunset together and can have a great photo to post in Instagram and you will feel satisfied for the whole holiday. Think of the bless and grateful for having good and great friends for the end of life.
- IV. for the last, take this opportunity to create a sweet memory to the old days even a memory was a weird things because a sweet memory can make us cried because we missed the moments and sad memory make us laugh because it make us happy because we successful survived from it, last but not list, "live while we young".
